Wipro earthian journey (Five years of Sustainability Education for Schools and Colleges)

Wipro 'earthian' came into being in 2011, out of the strong conviction that building awareness is the first step towards sustainability. The vision of Wipro earthian is rooted in the challenging task that humanity faces - of finding solutions to several sustainability issues like climate change, water scarcity, loss of biodiversity, etc.

The project aims at building skills, attitudes and values to shape a sustainable future. Our vision is to create an informed society by nurturing sustainability ideas within young minds in schools and colleges. Over the years, Wipro earthian has evolved and became more focused. The mandate is clearly to reach out and engage a generation that will inherit the earth from us.

The Core objectives of Wipro earthian are Integrating Sustainability education into school and college curriculums, to critically engage students with sustainability issues through multiple perspectives.

The TN Khoshoo Memorial Award was instituted in 2004 to honour the world-renowned environmental scientist, Dr Triloki Nath Khoshoo.

The TN Khoshoo Memorial Award was started by the Khoshoo Endowment Fund to encourage and promote individuals for outstanding achievements in the field of conservation and sustainable development. The award is a peer-level public recognition of excellence in the fields of conservation science, conservation policy and conservation action. The Fund is sponsored by Dr Khoshoo's family and friends, and Ashoka Trust for Research in Ecology and Environment (ATREE) which is merged with Wipro's Earthian Award.
