

SALT Workshop on

Social Norms-Health and Sanitation of Girl Child: Exploring Opportunities and Options

Venue: Xavier University Bhubaneswar, CH1 (Old Academic Block)

Date 26th October 2018

The *girl child* faces unique challenges to reach unto her full development and to exercise her capabilities. Paradoxically, she is the one who holds the key to positive development outcomes that reverberate across future generations. The initiatives to empower girl child are increasingly recognized as critical to breaking the intergenerational transmission of poverty. But, for such initiatives to have maximum impact, much effort is needed to make the *girl child* more visible in the development agenda. Their journey of life is influenced by the forces of multiple social and cultural practices. Among such forces, social norms are powerful influences that need to be better understood. In the light of the afore mentioned the expected outcomes of are laid down as:

- a) Concept and impact of Social Norms explained
- b) Social Norms mainstreamed through integration and dialogue
- c) Interdisciplinary approach of Social Norms appreciated and applied
- d) Social Norms resource pool & a strong network created
